

Life in the Pandemic

by Marina Rodriguez

Covid 19 started in 2019,
It was a happy year.
Then out of nowhere covid appeared
and we had to pause on our future careers

It was the worst
It felt like a curse

Then in 2022 a vaccine came to be
But it was a shame that the cure
wasn't meant to be.

For now, let's hope for things to get better
For us to stop writing letters
and maybe next year
There will be no more fear.
